- Prototyped and created new features.
- Conducted code reviews and tested to find and optimize critical parts of the application.

WALMART - PERSONAL SHOPPER

December 2018 - January 2024

PROJECTS

Flex Forum - React Native, Typescript, Rust, Postgresql

An android Instagram-like mobile app used for tracking workout history and sharing workouts/pics with friends. Rust back-end uses a custom built AI model to recommend posts to users based upon the user's interactions.

<https://github.com/carsonkrueger/Flex-Forum-Back-End>

Sun Shaft - Rust, Axum, Postgresql

Back-end server used to host media such as movies, shows, video games, and files. Users will be able to stream content to clients as well as upload new media.

<https://github.com/carsonkrueger/Sun-Shaft>

Compiler - RUST

A compiler that compiles source code to an assembly language and uses my assembler and virtual machine to create and run byte code! Available upon request, as per UVU student policy guidelines.

Duck Typer - React JS

A type racing game to improve your typing skills. <https://duck-typer.vercel.app/>

Much More on my GitHub (See Link Top of Page)

EDUCATION

BACHELORS OF COMPUTER SCIENCE - UTAH VALLEY UNIVERSITY

Graduated April 2024

ABOUT

Super nerd computer science graduate interested in everything tech related. Motivated to always learn new and exciting things. Proficient in various frameworks, languages and ideas. Can effectively communicate and eager to work (vim & arch btw).
